

Tribal War Lyrics

Chorus:

Tribal war can't stop this problem
Tribal war can't stop it at all (2x)

Verse 1

The other day I saw a young man with an M16 just laying at his side
I said, "Brother, tell me where are you going?"
He said, "I'm going to stand and fight for my right."

You alone?

Chorus

Verse 2

When two elephants are fighting it's the grass that suffers
When the devil starts a fire it's the innocent that burn
The people they are crying out for justice
The big men they must listen and should learn

My God

Chorus

Verse 3

People fighting with their guns and bombs cause of mental sickness
They reject humanity so they put their trust in war
Pure suffering and hate is their only business
The people they can't take it any more

So we sing

Chorus
